

session guide

FOR THE CYCLES APPROACH

1. **Review** – have child say the target words from previous session. Take data!
2. **Auditory Bombardment** – present 20 words with the target phonological process as the child listens. Use amplification if possible!
3. **Practice** – play memory, use a sensory bin, or other fun activity to get the child practicing the target words for the day. Make it fun, but be sure to get as many repetitions as possible! I recommend only using 5 target words at a time.
4. **Probe for next session's targets** – determine which target the child is stimuable for.
5. **Repeat auditory bombardment** – use the same word list from the beginning of the session.
6. **Home Practice** – send home word list or copy of session targets for students to practice at home.
